

Owning Genuine Samuel Jackson Equipment Has Never Been Easier...

The “Time and Bales” Payment Plan (TAB)

For selected customers who wish to extend payment on new equipment purchases, Samuel Jackson offers the Time and Bales Payment Plan. This finance plan assesses periodic payments based on the number of bales ginned each year. This fee-per-bale plan constitutes a loan with flexible payments. In addition to extended payment, this plan has the following advantages:

- Payment is based only on the number of bales ginned each year. This acts as an insurance policy for years when the number of bales is below average.
- At any time, bales can be paid in advance, saving interest.
- Effective interest rate is fixed at 10% (APR).
- Terms up to 4-1/2 years.

Example:

This example is for a customer who uses the Time and Bales Payment Plan to finance \$50,000 of equipment purchased in 2009. The bale basis is the number of bales the customers wants to finance the purchase over. In this example, the basis is 50,000 bales (the basis can be changed to accommodate different size gins and different payoff rates). Each year the minimum payment is calculated from the number of bales ginned. The customer may elect to pay bales in advance at any time (see year 2 in the example).
